User could pick up their breakfast from the locker

through survey:

58%

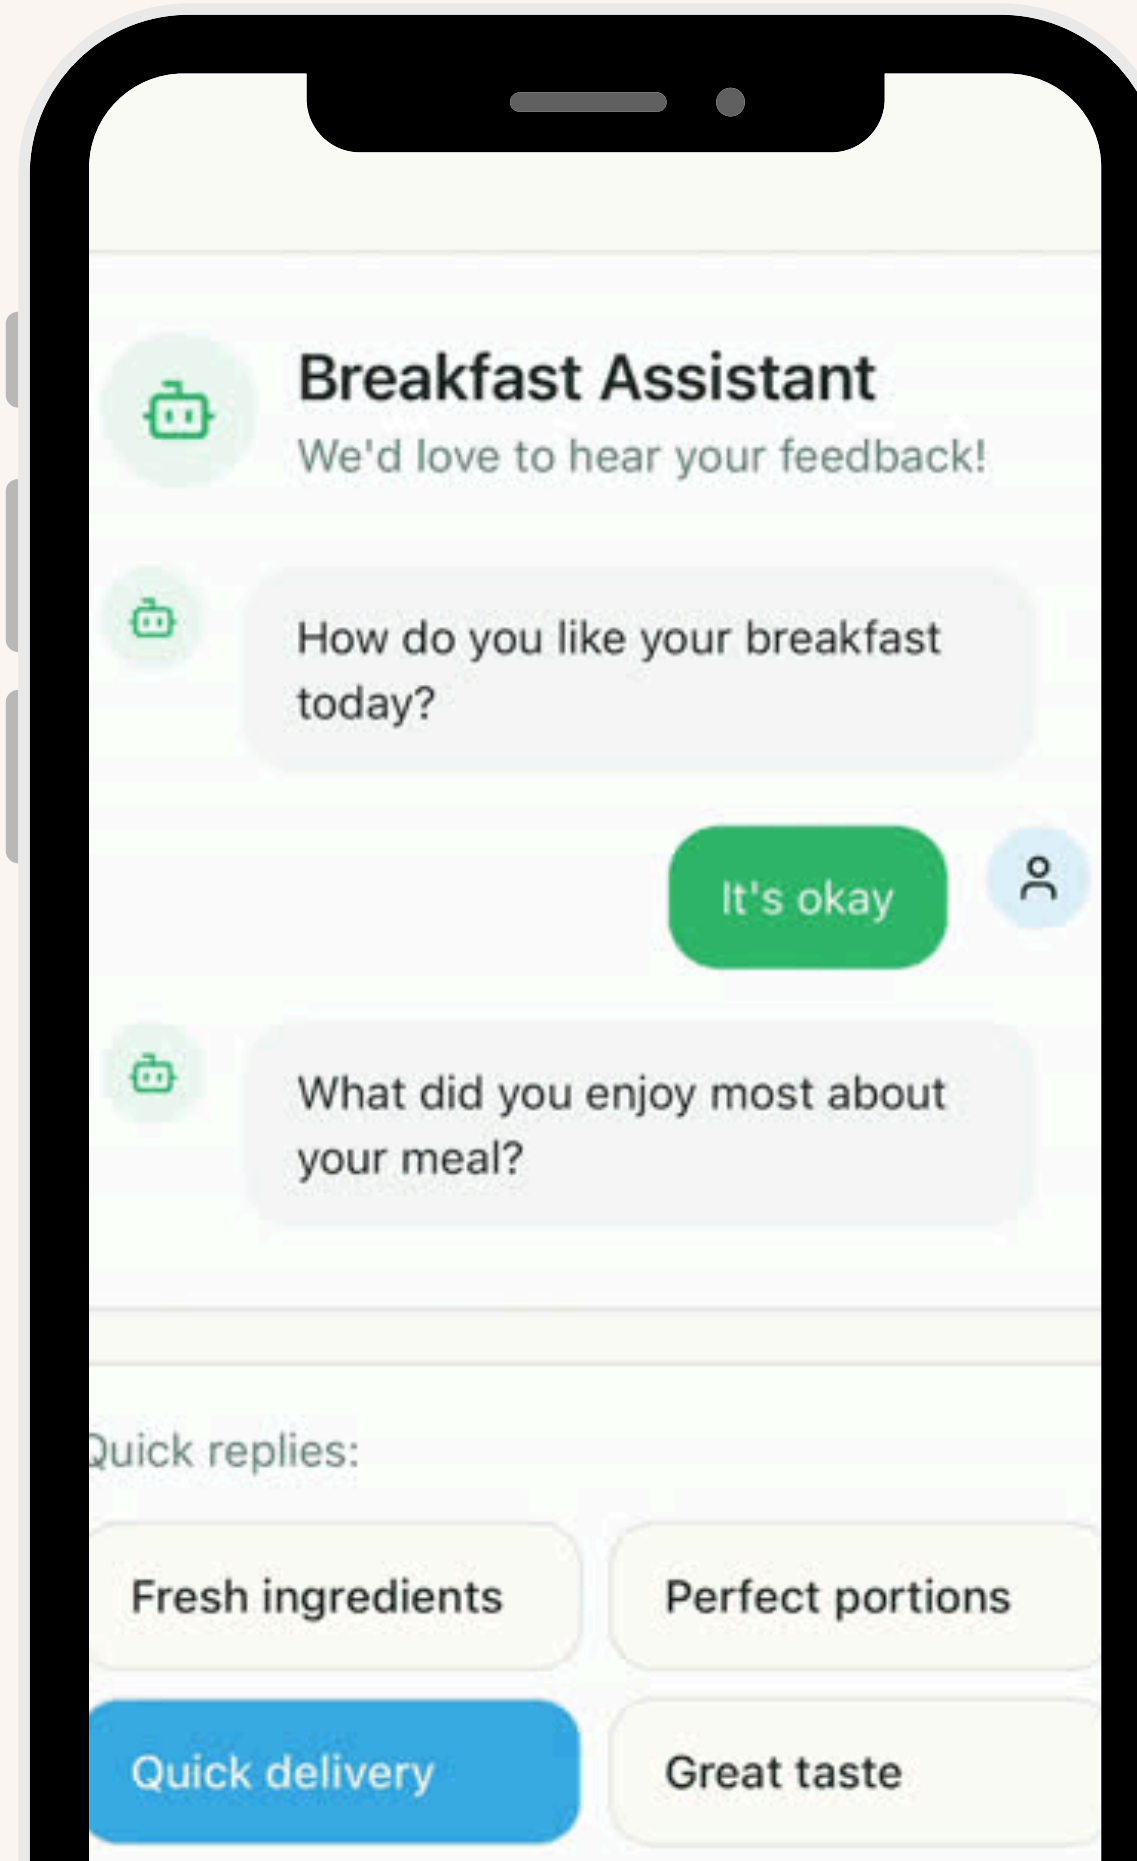

are willing to try the locker pick-up service

Berliner's Food Pick-Up Habit needs to be validated through test

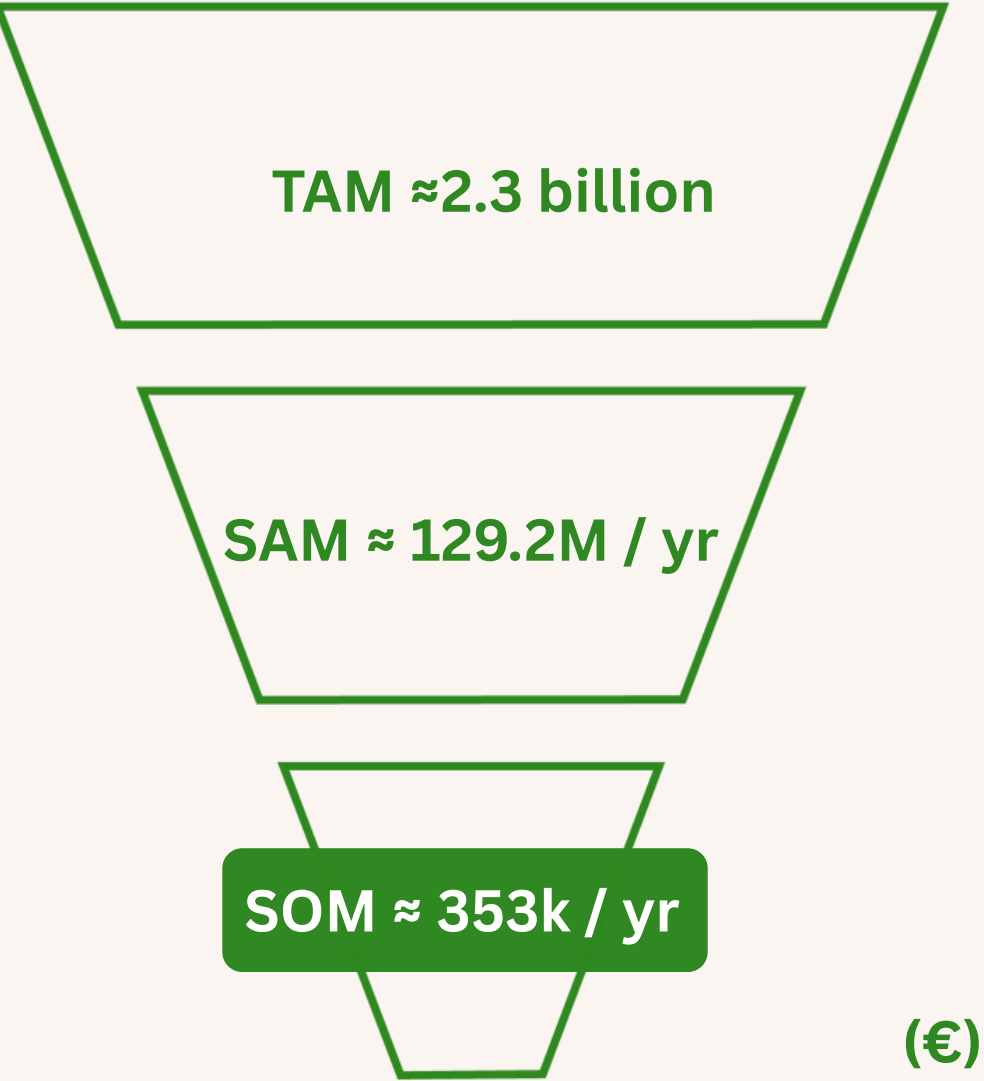

Encourage users to give feedback without burdering the users

User could give feedback by interacting with our **Breakfast Assistant**

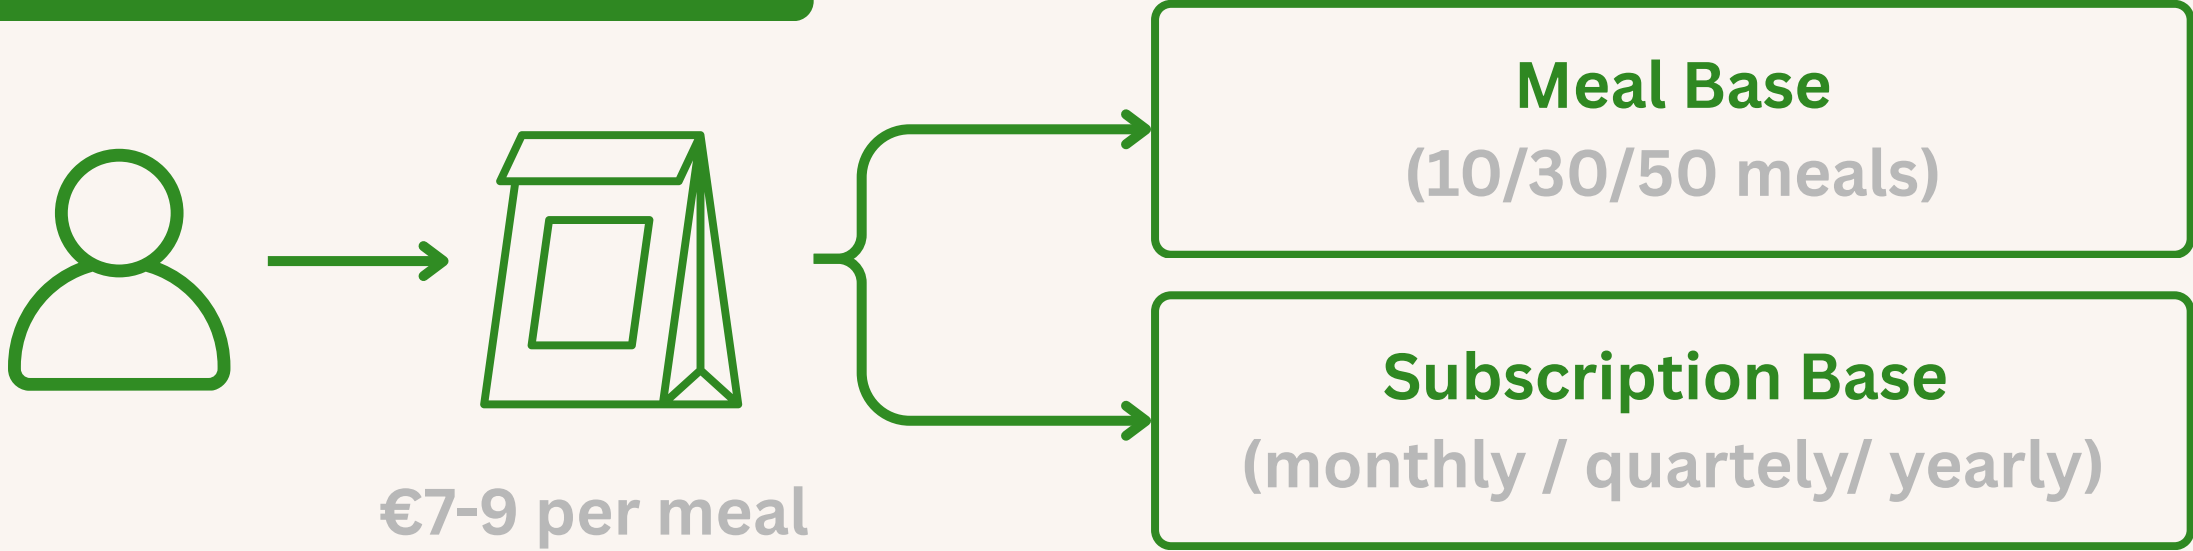

Changes could be made accordingly on the next breakfast!!

Business Model

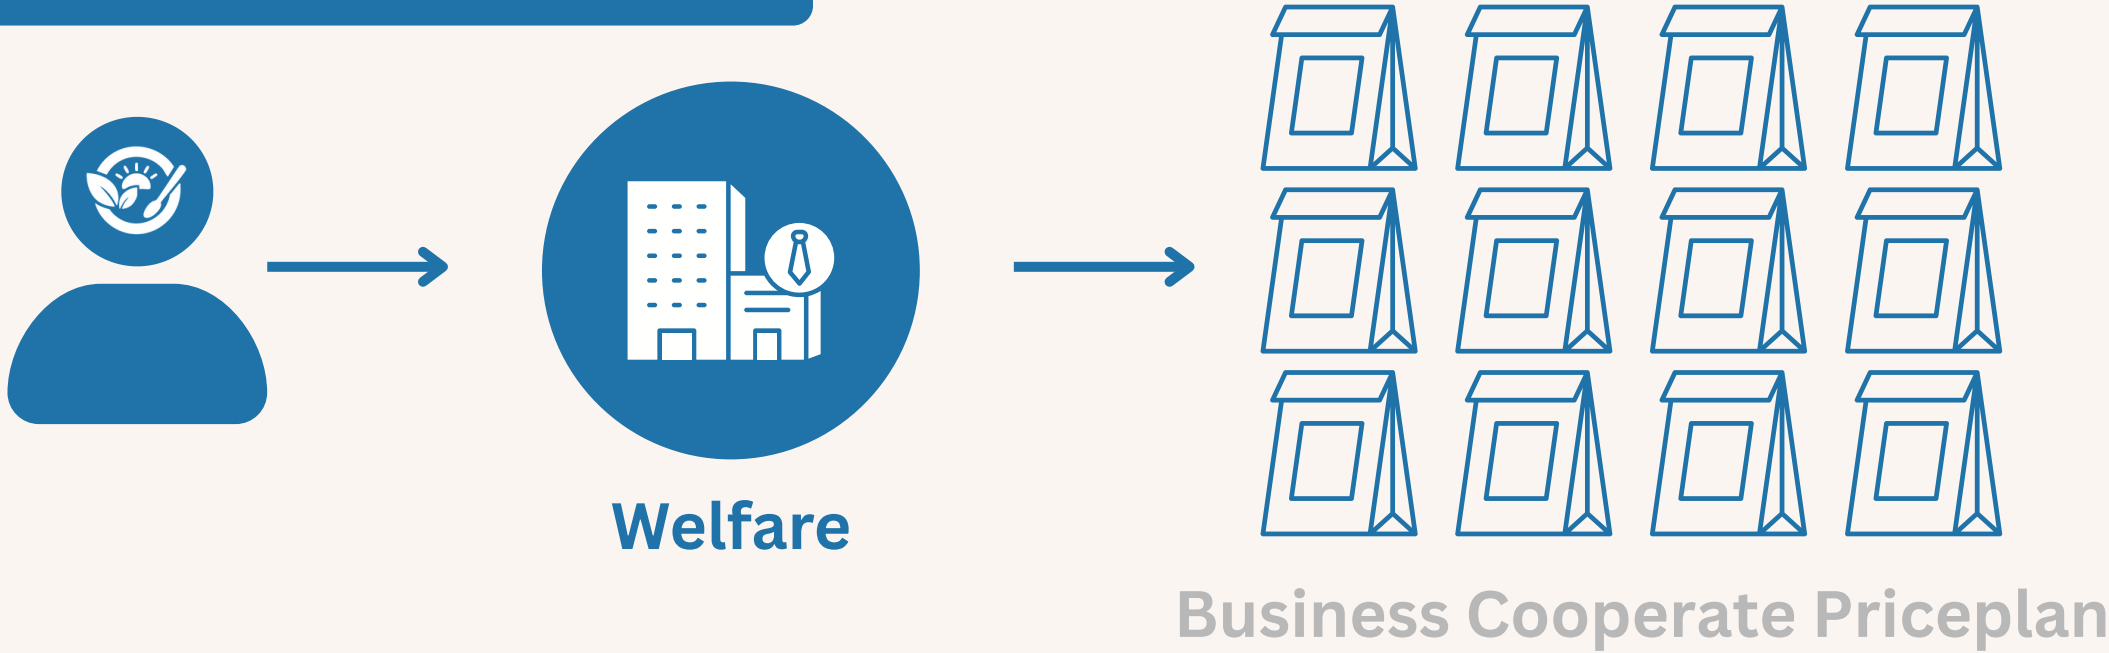

- TAM: The size of the entire Berlin breakfast outing market.
- SAM: The annual breakfast spending potential of Morgenflow's core customer base in the Berlin area
- SOM: The projected revenue from customers actually captured by Morgenflow's business in Berlin during the initial launch phase

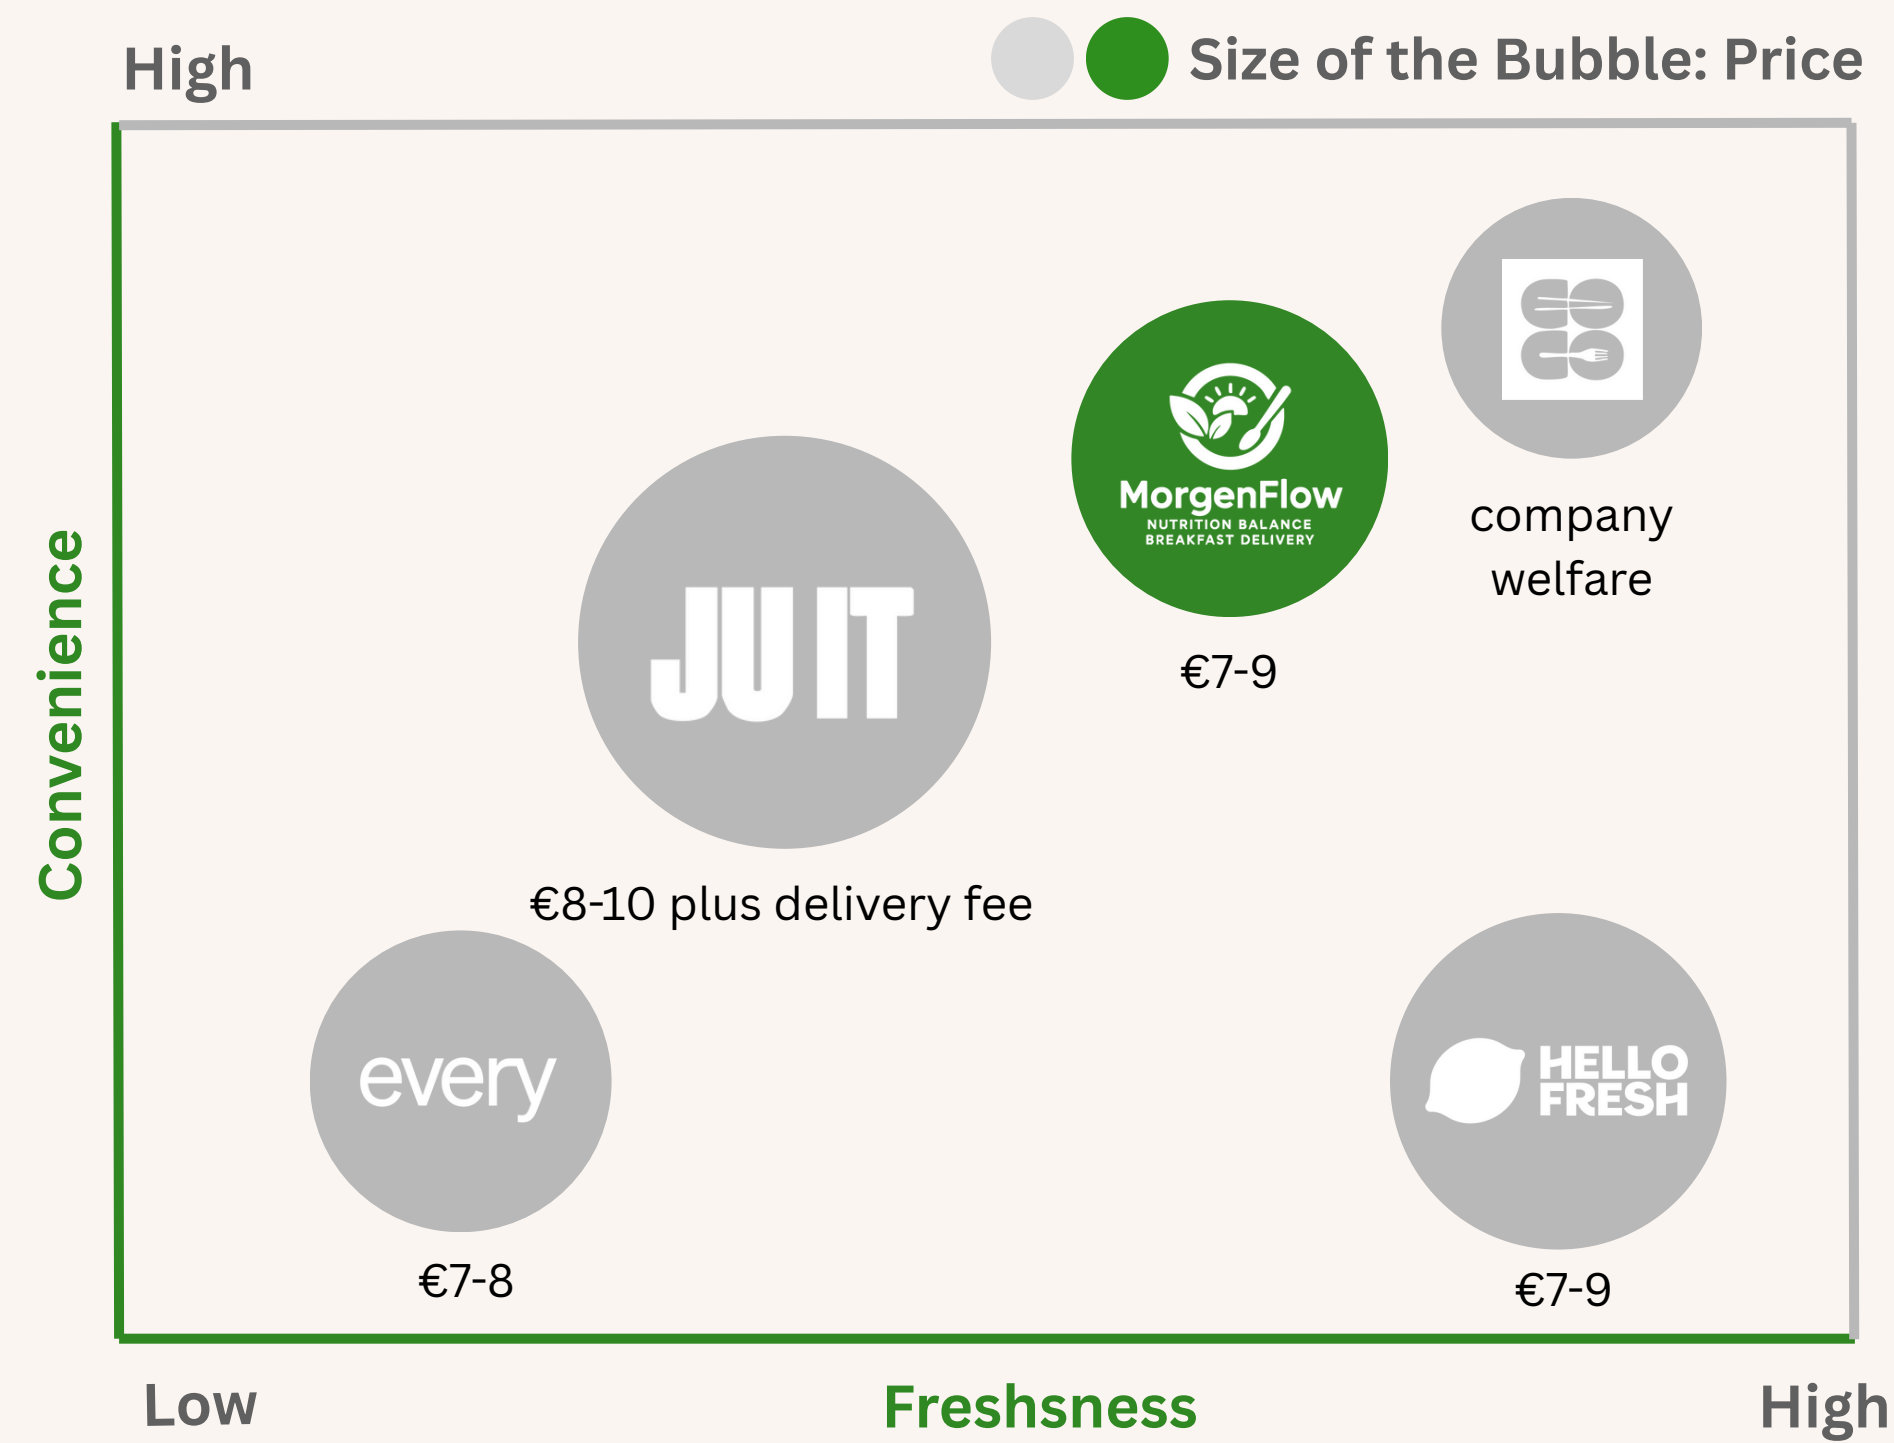

B2C business model

B2B business model

Superior Freshness and Flexibility in a Crowded Market

MorgenFlow holds advantages in price, freshness, and convenience.

Notably, ChefCoco has established a first-mover advantage in B2B partnerships, providing lunch services for companies like Netflix and Delivery Hero.

Roadmap in the Future Year

Week 1–12

Market Validation
(launch an MVP)

- KPI:**
- First-order satisfaction $\geq$ 80%
 - Repeat purchase $\geq$ 30%

Week 13–24

Consolidation &
Optimization

- KPI:**
- Locker turnover $\geq$ 160 order/day
 - 25–50 active subscribers

Week 25–40

Controlled
Expansion

- KPI:**
- 2 new districts reach
 - 3–5 corporate clients

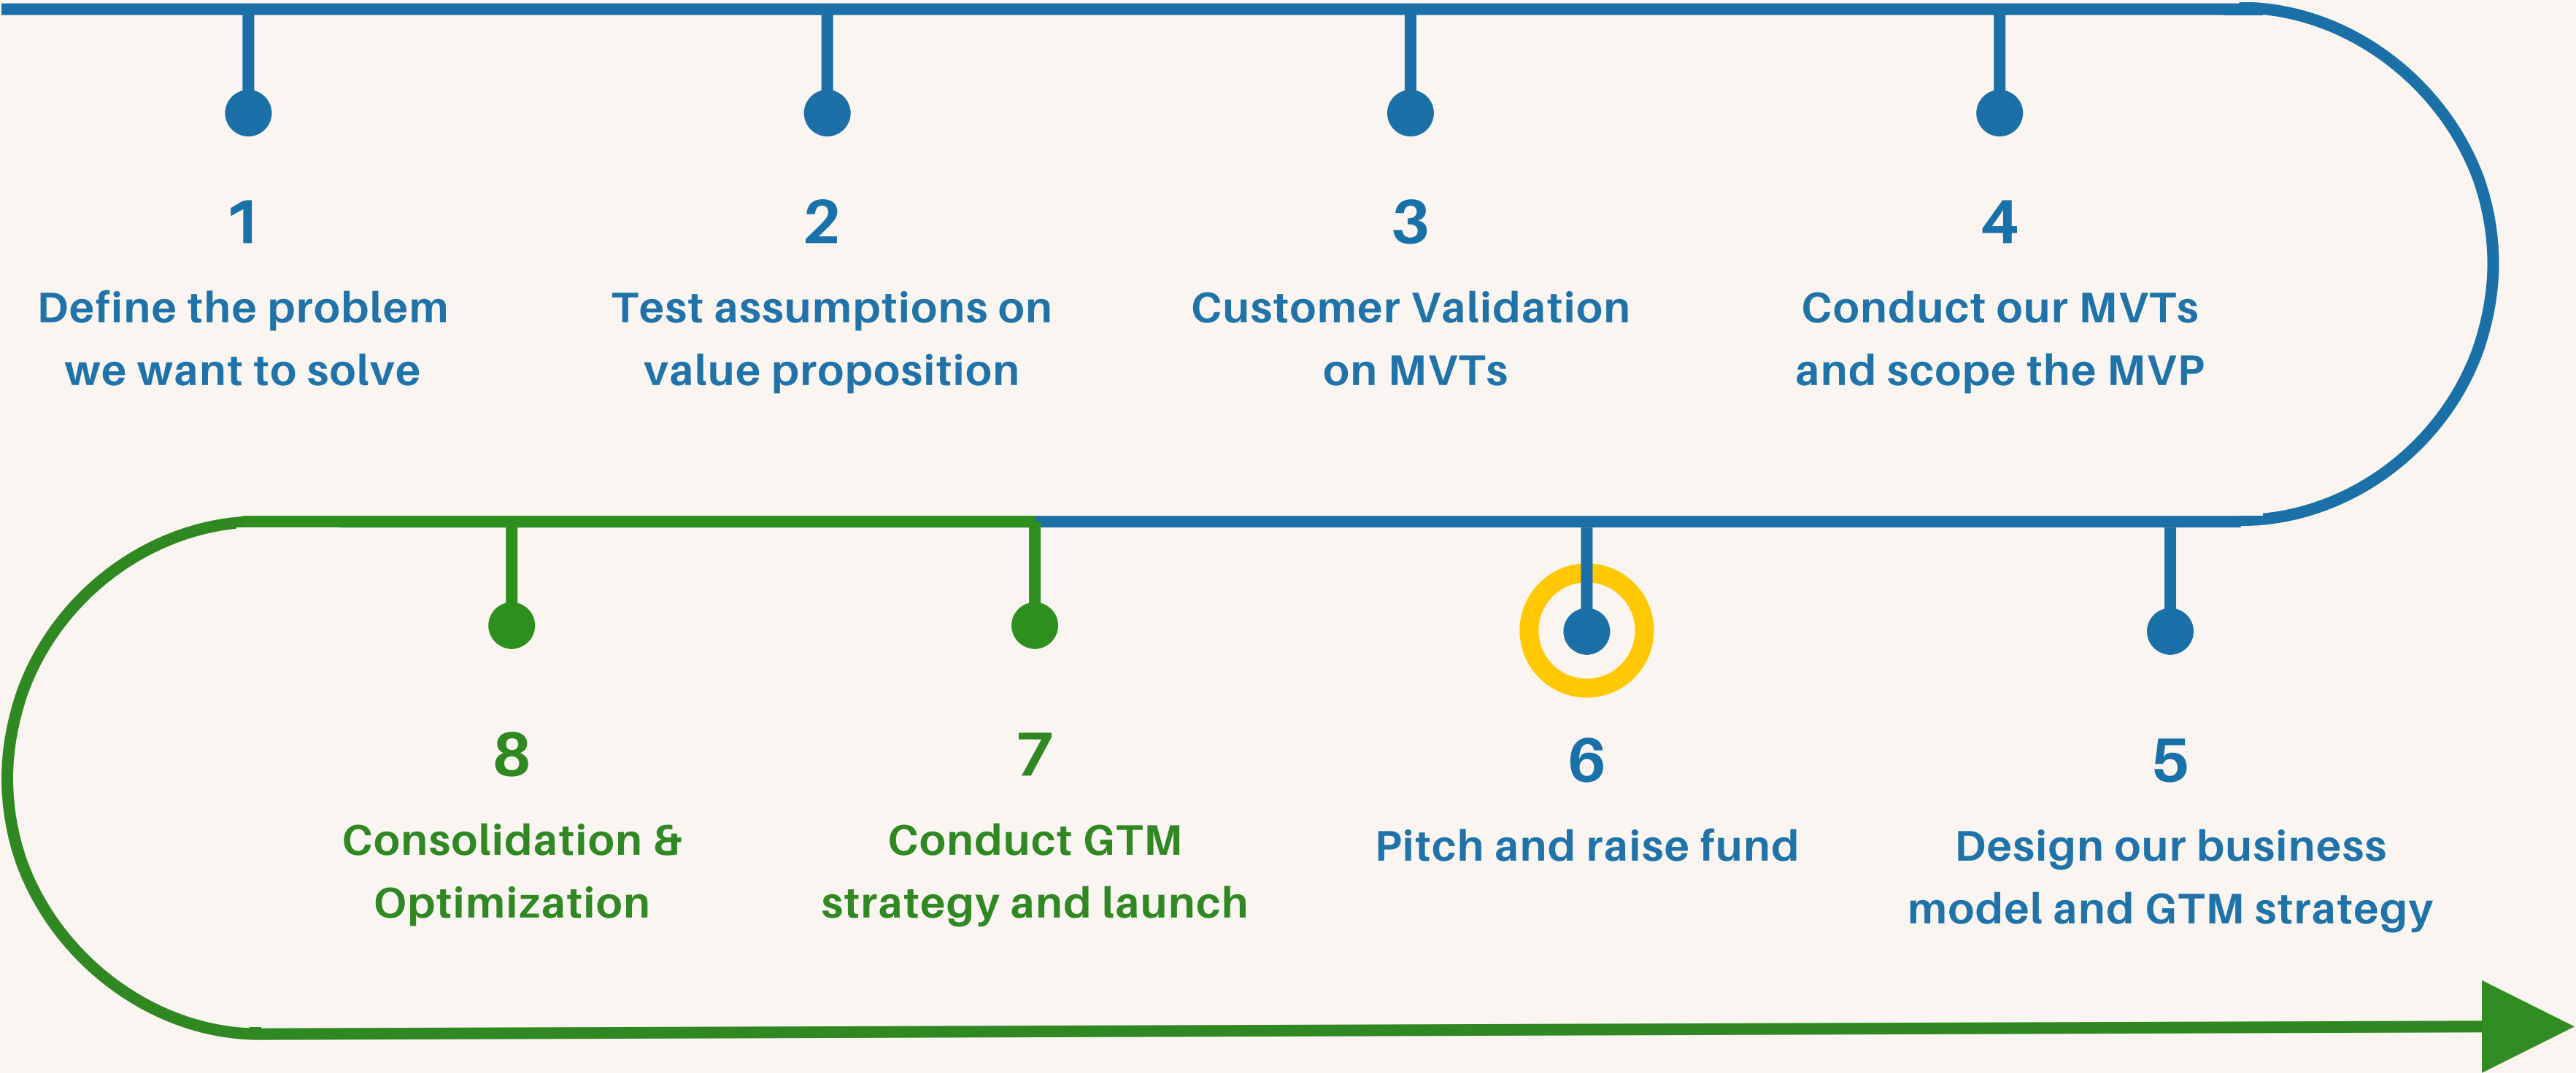

Week 41–52

Scaling

- KPI:**
- System efficiency improvement $\geq$ 20%
 - Total corporate clients: 7–9

Why us?

CEO
Yilin Liu

Market Strategy Lead
Delivery driver

- Strong market insight & user understanding
- Fast execution and decision-making
- Skilled in team coordination and early-stage strategy

CAIO
Ting Yi Liu

Product Design & UX Lead

- Excellent UI/UX design skills
- Strong user journey and product thinking
- Able to build clean and intuitive digital experiences

CCO
Wensu Xian

Market Research Lead
Customer Service

- Strong market research & growth planning
- Skilled in branding and user acquisition
- Good at partnerships and channels

COO
Haowen Zheng

Chief Execution Officer
Delivery driver

- Solid retail & operations management
- Skilled in process design and SOP creation
- Strong on-ground execution and team coordination

CPO
Ruiling Xu

Data & Insights Lead

- Strong data analysis & modeling ability
- Skilled in SQL/Python and dashboards
- Data-driven decision making

CCO
Yang Bai

Supply Chain Lead
Deliver Driver

- Expertise in supply chain & procurement
- Strong cost control and supplier management
- Knowledge in food logistics and quality assurance

**By fixing your morning,
we can empower your entire day!**

Q&A

Appendix

Regulatory Check – Unmanned Parcel Lockers Near U-/S-Bahn Stations (Berlin) - 1/2

Berlin does not prohibit parcel lockers near public transport nodes

However, compliance **depends on the type of land**:

- Public street / station forecourt (public road land) → requires a special road use permit (Sondernutzungserlaubnis)
- Land owned by BVG / DB (stations, forecourts) → requires a contractual agreement with the owner and compliance with building / safety rules

Under these conditions, unmanned parcel lockers near U-/S-Bahn stations are **legally feasible**

1) Building law – Berlin BauO Bln

- District information sheets (e.g. Charlottenburg-Wilmersdorf) classify parcel lockers (Paketstationen) as “bauliche Anlagen” (building structures)
- Their erection / modification / removal is usually exempt from formal building permission (“verfahrensfrei”) under §61(1) BauO Bln
- Exemption does not remove other obligations: the lockers must still comply with planning law, heritage protection, fire safety, accessibility etc.

Regulatory Check – Unmanned Parcel Lockers Near U-/S-Bahn Stations (Berlin) - 2/2

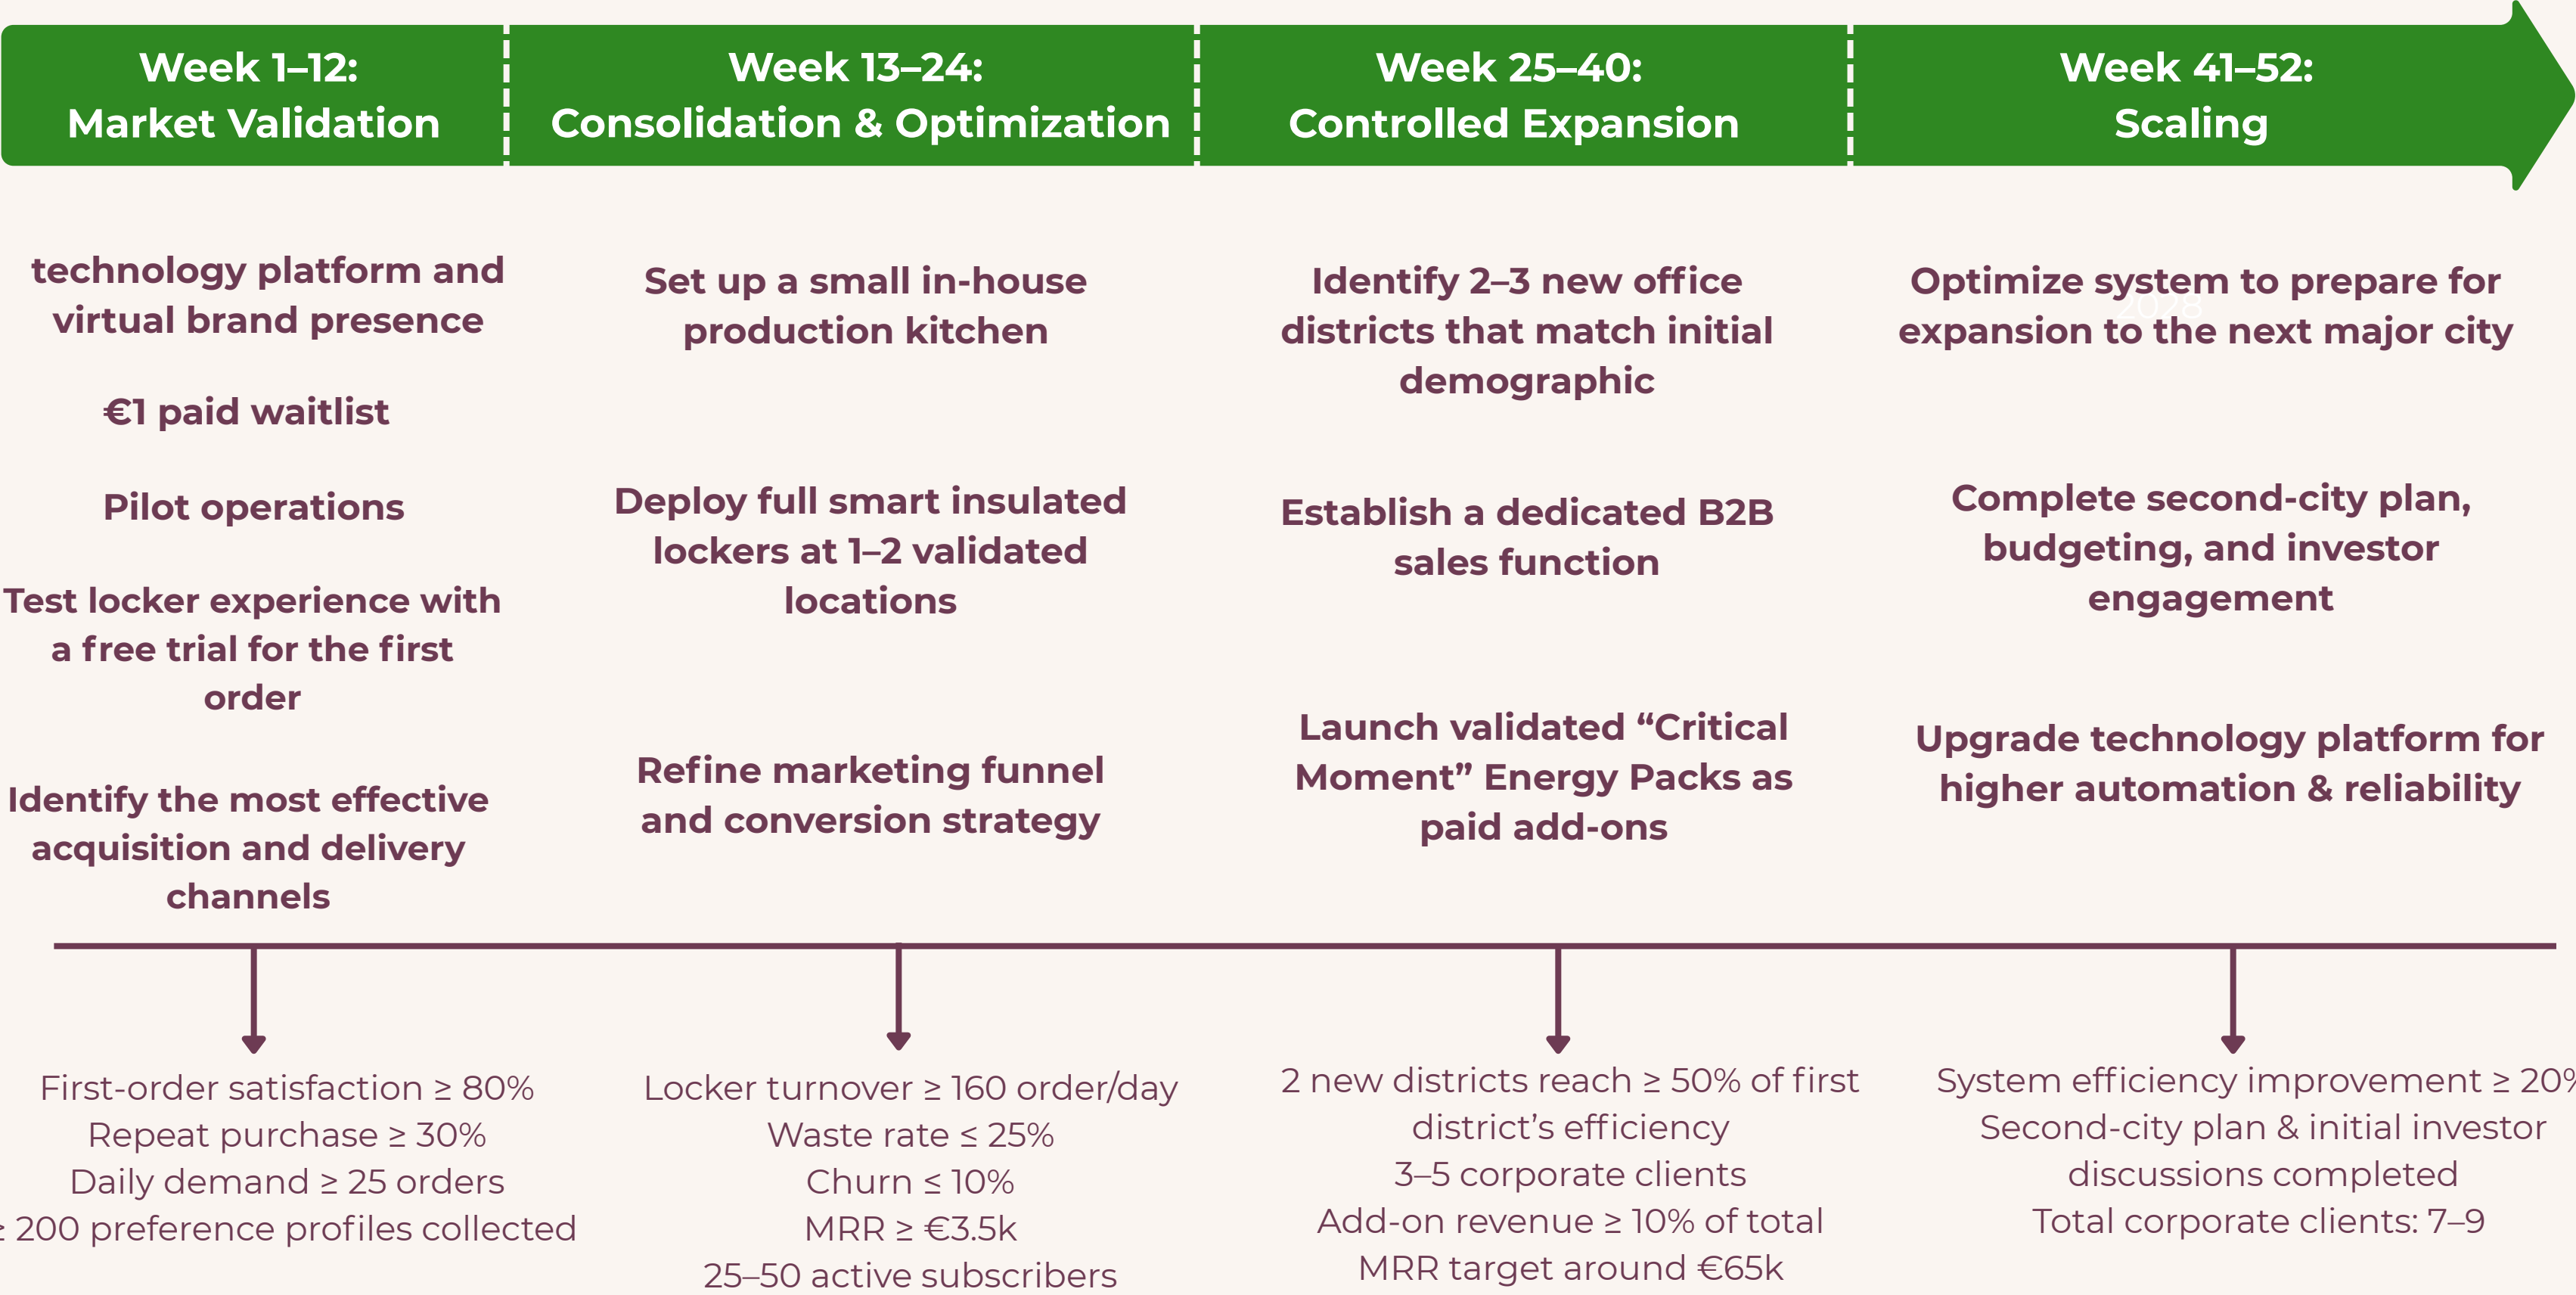

((2) Public street land near stations

- §11 of the Berliner Straßengesetz (BerlStrG): **any use of public roads beyond ordinary traffic is a “Sondernutzung” (Special Use)** and requires prior permission from the road authority
- Several districts (e.g. Tempelhof-Schöneberg) explicitly state that Packstationen in public road space are Sondernutzung and can be permitted under §11 BerlStrG, subject to conditions and fees
- Typical practice:
- **Apply 4–8 weeks before installation**; permits are often granted for one year and can be renewed
- Requirements (vary by district) usually include: minimum free sidewalk width (e.g. ≥ 2.5 m), no obstruction of crossings, fire routes, or barrier-free paths

((3) Station premises (BVG / DB land)

- Lockers installed inside stations or on forecourts owned by BVG / DB are treated as commercial facilities on private land
- You need a lease or cooperation agreement with BVG / DB's property / retail unit, in addition to compliance with BauO Bln and the operator's house rules
- If the exact area is legally classified as public road land, a Sondernutzung permit may be required in parallel(case-by-case assessment with the district authority)

Brand		Food Freshness/healthyness	Convenience	Price Range	Subscription Flexibility
MorgenFlow (breakfast)		High made-to-order, delivered fresh	high pick up in convenience	Medium €7-9	High on-demand and pause anytime
ChefCoco (B2B lunch)		High custom fresh meals	High deliver to office	/	Provided as company welfare

HelloFresh		High sell ingredients from selected recipe	Low need to cook, order ahead	High €7-9	Weekly meal plans, moderate flexibility

Customer Validation on Breakfast Habit

Initial Idea and breakfast habit

- 93% believe that breakfast is **positively related to their morning work efficiency.**
- 64% think that this service is attractive to them.
- 57% are willing to pay **€7–9** for such a breakfast service.

We have **30 interviewees**, Include both **students** and **office workers**. Those who show a higher interest in this service mainly come from: professional / consulting / corporate / management. What they care about mostly are convenience, efficiency, health and freshness.

Students					
Customer	Age	Occupation	Breakfast habit	Breakfast → productivity (opinion)	Service feedback
Customer 3	24	Student	bread / fruit	no, he prefer a nutrition-balance lunch or dinner. "I don't need a balanced breakfast to start my day. A wonderful sleep is more important."	I think the idea is fabulous but not for me. I may want to try this service once a week but it gonna consider it as necessity, the time percision of delivery is also a concern.
Customer 4	26	Student	bread and coffee	no	time in the morning is often tight, the delivery time is also a concern.
Customer 5	24	Student	bread	no, her purpose of eating breakfast is just to keep her stomach from rumbling.	depends, if the workload of the day is heavy this would be a great and convience option
Customer 7	26	Student Account Executive at Tech company	pastry/ brezel/sandwich/cereal bowl	yes I	good idea, but I wonder wether the supply chain is efficient enough. I would subscribe if the food is of good taste and convenient enough to pick up.
Customer 12	21	Undergraduate Student (Media and Communication)	ham sandwich/strawberry yogurt and croissant	Not too much. Cut she feels like even if she had a nice breakfast, it won't keep her from being sleepy	Practical. Yes. But will focus on the price.It sounds a little bit expensive
Customer 16	22	Student	milk&bread/soymilk&fried dough stick	yes	if life is relatively regular, it will not be the choice for the time being
Customer 17	20	Student	soymilk&fried dough stick/ McDonald's boiled outs	yes/eating breakfast can help me concentrate on studying until the afternoon	very convenient but worry about the freshness. I will order a nutritious breakfast that will change the menu, which will save me a lot of energy and time.
Customer 20	26	Student	bread cheese ham jam	yes	good and well subscribe.disadvantages to it as well like additional efforts (picking up parcels, delayed delivery, choosing groceries) and increased pricing in comparison to alternatives
Customer 22	20	Student	Sandwich	No	I barely eat breakfast since I don't have an appetite in the morning
Customer 23	20	Student		yes	A good breakfast is a good start
Customer 27	23	Student	fried egg/meat/sausage with pans hot bread/milk	Maybe lunch will decide this problem, breakfast is not that important.	Can it be delivery efficient (working time) will it be on time-get 7/ 10X / save sleeping time (diversity of ingredient save time price reasonable
Customer 28	23	Student	coffee / tea	yes,Health	Yes, save time
Customer 29	22	Student	bread	yes Breakfast is the most important meal of a day. Usually having the breakfast could help me more awake and pay attention on my job	If it is of good quality, low price and convenient, it is a pretty good solution.

Breakfast Habit

- Most eat breakfast daily or 3-4 times/week on weekdays. A minority rarely eat due to busy schedules or lack of appetite.
- Between 7:00-9:00 AM, aligning with work/class schedules.
- Where to eat
 - Home: Cereal, bread, fruit.
 - Bakeries/Stores: Pastries, sandwiches.
 - Cafeterias: Limited options

office workers					
Customer	Age	Occupation	Breakfast habit	breakfast → productivity (opinion)	Service feedback (7-10)
Customer 2	24	Consultant of studying abroad	coffee, cereal, full grain bread	Not necessarily -- for the interviewers, breakfast just means having something to eat; they're not really hungry in the morning.	Even though they're inclined toward this service, they would still prefer to cook for themselves, mainly due to cost considerations.
Customer 6	25	Data Scientist at Tech company	Dumplings/Eggs	yes	It should work on some people needs get up early to work, but not for me. For internet company, it's not required to work from early morning. So I won't pay for this service.
Customer 8	28	Consultant at a management consulting firm	at home: yogurt/ fruit/croissant, at home: coffee or I grab a sandwich on the go.	yes, On the rare occasions I have a proper breakfast, I can definitely feel more focused and less prone to be sleepy in the morning.	The adjustment based on feedback is particularly appealing for someone with an irregular schedule like me. I'm very willing to try it because it solves my two biggest problems: lack of time and not knowing how to balance nutrition.
Customer 9	30	Engineer at a leading automotive company	bread/cheese/ham/coffee.	yes	This is a great idea to take the burden off my girlfriend and help us eat healthier. I'm willing to try it, especially if there's a package for couples or families.
Customer 10	24	Employee at an e-commerce company	Croissants, latte, or a chicken sandwich	yes/having a breakfast that looks and feels good makes me feel better and more confident throughout the day.	I would definitely be an early user! It would be so cool to share such an intelligent, customized breakfast on my Instagram.
Customer 31	32	VP of an international company	bread/tea/milk/coffee/sandwich	I believe a healthy body is fundamental to business performance, and breakfast is the foundational fuel for the day.	It turns a daily chore I have no time for into an optimized, efficient solution. I would not only subscribe for myself but also consider offering this to my direct leadership team as a productivity-enhancing benefit. It goes back previous preparation time to me and my team.
Customer 32	28	Employee until last month / now self-employed		yes	It's! But if the price is high then not so much! +
Customer 11	41	Operations Specialist	Panini at Starbucks or yogurt the day before	Don't know. He just has the habit, but never thinks about it.	It would be really, really great if the breakfast could be delivered to the front desk, because sometimes their coffee spills when they squeeze into the subway.
Customer 14	37	office worker	vegetable patties and salad, and occasionally avocado with bacon	Absolutely yes -- skipping breakfast can be bad for the stomach, so does similar research before	
Customer 15	29	Supply Chain operational management	A wrap -- kind of like a Spanish-style burrito.	Of course, they used to love brunch, since it's quite popular in Spain, but they often get stomachaches from being hungry in the morning.	It's not very useful for him since his wife is a full-time housewife, but if the price were affordable, he would consider it, it could help reduce his wife's burden a bit.
Customer 18	32	manager of the railway company	work days: eggs / pig/hurt/ blueberry; weekend or holiday: chinese breakfast	yes	not really-unless chinese breakfasts breakfast can be delivered
Customer 19	24	worker at retail company	coffee bread egg bread ham	yes	rice, convenience and available will impact the choice
Customer 21	26	Employee		yes	really interesting
Customer 24	30	Employee		yes	
Customer 26	34	Coffee Shop Staff	Banana milk egg coffee	yes	never choose no interest

Opinions on AI

- Supporters see data-driven personalization as "cool" and "efficient" - key for premium positioning
- Skeptics worry about privacy, complexity, and "feature bloat" - functionality must provide clear value

Pick-up preference

- Meal lockers are widely accepted if extremely conveniently located (office building lobbies, subway stations)
- Want to avoid courier coordination uncertainty
- Temperature maintenance is critical

Customer Validation on Pick-up Service

Pick up Service

- The users are willing to arrive 10 minutes earlier (window time) to pick up the breakfast at the pick up point.
- The delivery will be on time to make sure users can get their breakfast when they arrive in pick-up station.

Atomic unit :

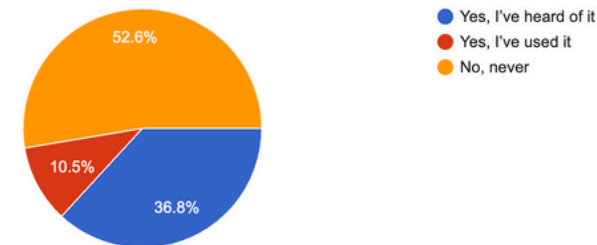

Validating the pickup time window via **surveys/interviews** → small pilot → scaled testing

Surveys/Interviews: First run a questionnaire and in-depth interviews to assess whether people are willing to spend a few extra minutes in the morning to pick up their meals.

Have you ever heard of or used **food pick-up lockers** (automated lockers for collecting online food orders)?

19 responses

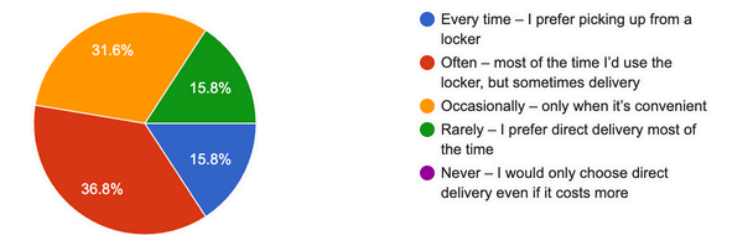

[Copy chart](#)

If you subscribed to a breakfast delivery service, how often would you prefer to **pick up your meal** from a locker instead of having it **delivered directly** (with an extra delivery fee)?

19 responses

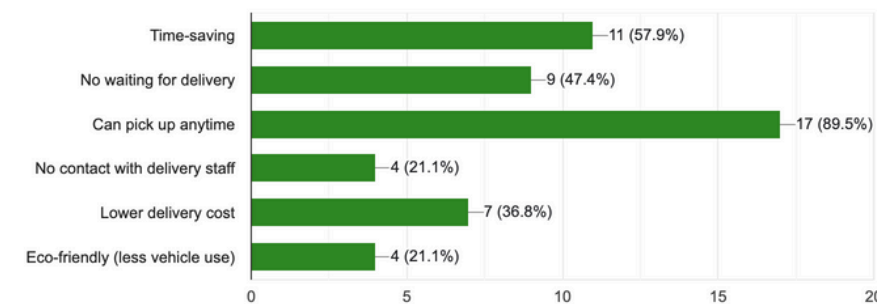

[Copy chart](#)

What do you see as the **main advantages** of using food pick-up lockers? (Select up to 3)

19 responses

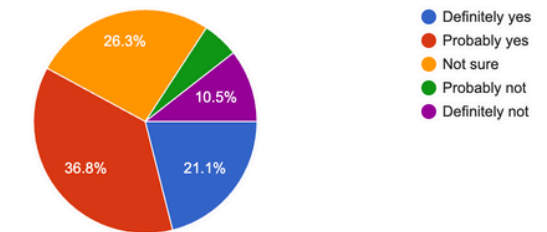

[Copy chart](#)

If you subscribed to a workplace breakfast delivery service, how willing would you be to **pick up your meal from a locker near your office building or subway station**?

19 responses

[Copy chart](#)

Validation

The survey mainly target **German residents** in the age range of **25–34**. they are not familiar to pick up food in the locker, there might be some concerns. But the **willingness of trying the service is in average high**.
